Profile

Curious and passionate Computer Engineering student with a strong enthusiasm for artificial intelligence, software architecture, and problem-solving. I enjoy exploring machine learning, data analytics, and full-stack development, constantly seeking to enhance my skills through hands-on projects and research. I have a keen interest in optimizing algorithms, understanding system design principles, and building efficient backend infrastructures. Beyond development, I stay up-to-date with cutting-edge AI advancements and am particularly interested in how deep learning and automation shape the future. Always eager to collaborate, learn new technologies, and tackle complex challenges in the world of software engineering.

Professional Experience

Full Stack Developer Intern

01/2025 – 04/2025

Turkcell Technology

Istanbul

- Developed a credit management system using .NET Core Web API, ADO.NET, React, and SQL Server, enabling users to process and track loan applications efficiently.
- Implemented advanced filtering and query optimization features, improving data retrieval efficiency based on approval status, date range, credit type, and loan amount.
- Designed and optimized secure RESTful APIs, applying clean code principles (SOLID, DRY) to ensure scalability and maintainability.

Software Developer Intern

07/2024 – 10/2024

Altınay Robot Technologies

Istanbul

- Optimized palletizing processes by creating algorithms to efficiently layer objects on pallets. Contributed to C# development, including coding, testing, and debugging for robotic projects.
- Assisted in the development of machine learning models for analyzing medical images, and gained experience in preparing data for these models.

Software Engineer

09/2023 – 12/2023

42 Kocaeli

Kocaeli

- After successfully passing a two-stage selection process, participated in the main training where foundational knowledge of the C programming language was acquired.
- Developed custom C libraries and gained proficiency in Git, Bash scripting, and low-level system programming through hands-on projects.

Education

Computer Engineering B.S

2020 – 2025

Dogus University

- Focused on software development, artificial intelligence, and data science through coursework and hands-on projects.
- Gained experience in machine learning, full-stack development, and algorithm optimization during academic studies.

Skills

Python, Git, C, Machine Learning, Data Science, Java, C++, C#, JavaScript, .NET Core, ADO.NET, SQL, REST API Development, OOP, React

Languages

- Turkish(Native)
- English(Advanced)
- German(Elementary)

Organizations

GDG ON CAMPUS DOU Software Development Team Lead	10/2024 – 12/2024
AIIESEC Istanbul B2B - Team Member	06/2024 – 09/2024
Software Club at Doğuş University Vice President	10/2022 – 10/2023

Certificates

Python Programming for Data Science  Miuul - 2024	Technology Literacy Program  Akbank Youth Academy - 2024
Machine Learning  Stanford University - 2024	ACT28 Hackathon Program  Samsung & UNDP - 2024
Development Journey Program  Insider - 2024	MUNDP  Kabataş School - 2017
MUNDP  The Koç School - 2017	

Courses

Akbank Youth Academy Technology Literacy Program	06/2024 – 07/2024
Miuul Machine Learning Camp	09/2024 – 11/2024
